

POCARED Diagnostics

Microbiology at the Speed of Light

POCARED P-1000™

- Rapid diagnosis
- No need for reagents
- No need for culture or growth cycles
- Unequaled level of quality control
- Automated
- Compact
- Easy to operate
- Increases efficiency
- Can analyze multiple specimen types
- Significantly reduces labor

POCARED Diagnostics

Microbiology at the Speed of Light

Rapid diagnosis

Only 40 minutes from fresh specimen to species identification.

No need for reagents

Identification is based on the organism's intrinsic fluorescence – eliminate all issues associated with reagent management.

No need for culture or growth cycles

POCARED's technology works directly on specimens. No pre-processing is required.

Unequaled level of quality control

Every carousel contains a quality control test.

Automated

Both sample preparation and analysis are fully automated.

Compact

The P-1000™ is a standalone unit. The system does not require a bench space.

Easy to operate

The P-1000™ can be operated by a lab assistant. System operation is simple and intuitive.

Increases efficiency

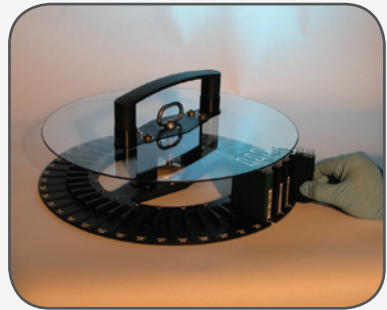

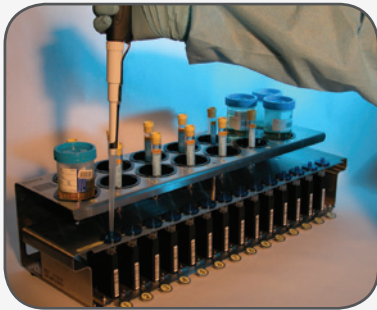

With a high throughput and level of automation, the P-1000™ offers a new level of efficiency.

Can analyze multiple specimen types

Urine, swabs, blood and other body fluids are all analyzed by the P-1000™.

Significantly reduces labor

Perfect solution for labs facing labor shortages or increasing volumes.
